Abstract

The importance of continuous professional development of teachers is ensured by the global context of demands on education, with frequent changes increasing the motivation of teachers to update their knowledge in order to ensure the quality of the educational process. In this article, the relevance of in-service training programmes for educational managers in building an overall vision of teaching and education is analysed, effectively coordinating the teaching community in order to promote the quality of the educational process, demonstrated by relevant results, correlated with labour market requirements.

Keywords: study programmes, lifelong learning, personal development, educational manager

Abstract

This article analyzes the etymology related to wine terminology and the previous researched approaches. In the last decades there have been sporadic researches on the etymology of wine terms and their evolution over time. We will shed light on the evolution of the wine lexicon, but also on the current use of wine terminology. Although wine terms from various languages are used in the modern Romanian vocabulary, the weight of the Latin element in wine terminology is definitely highlighted.

Key words: wine, etymology, wine terms, origin, lexicon.

Etapa studierii evoluției unui cuvânt a cărui origine a fost stabilită implică reconstruirea succesiunii temporale a variantelor formale și a semnificațiilor, apelându-se la mijloacele cronologiei și la dovezi extralingvistice. În mod clar, prin etimologia unui anumit cuvânt se înțelege indicarea sursei acestuia. Diferențiem între etimologie internă (în cazul cuvintelor create în interiorul limbii prin compunere, conversiune și derivare) și etimologie externă.
